Lytespan - Line Voltage
Lasso/Theatrical Lytespots

Lasso™
A striking combination of miniature size, halogen light and elegant style. This unique Lytespot® is formed from sturdy chrome-plated steel and joined to an adjustable die-cast aluminum adapter. Provides crisp, white halogen light with a choice of PAR20, PAR30, or PAR38 lamps. Produces the distinctive white light of low voltage without the need for transformers. The lamp fits snugly into a resilient silicone collar that traps spill light. Accessories include hex cell louver, spread lens, beam smoother, barn doors and color filters.

Theatrical Lytespots
Influenced by the aesthetics of stage lighting, Theatrical Lytespots combine dramatic style with affordability. Line voltage styles are designed around the proportions of the PAR30 lamp but can use a PAR38 lamp as well. An external accessory holder is not required for these Lytespots® making them an extraordinary value. One unit has an integral barn door and the other unit features an integral accessory cartridge that can accommodate up to 2 accessories simultaneously.

Theatrical Low Voltage Lytespots
Accent lighting that offers versatility and the added punch that only low voltage lamps can provide. The front face of these distinctive Lytespots® swings down for easy relamping. Integral springs in the front of the fixture can accommodate up to two accessories simultaneously.

For Accessories see pages 370-371

Lytespan - Line Voltage
Dramalux

Dramalux®
When it comes to lighting galleries, museums, institutions and large retail interiors, Dramalux offers the perfect blend of performance, flexibility and durability. Each fixture can produce a wide range of lighting effects thanks to integral spring clips that support accessories such as color filters, spread lenses, louvers and barn doors. Easy "back door" access permits lamp changes without disturbing the accessories. The Dramalux Framing Projector & lensed Wall Washer, create special light distributions in housings that are coordinated with the core, Line Voltage Dramalux Lytespots.® The Dramalux family of products can solve the most demanding lighting problems while maintaining a consistent aesthetic.
