Explosion-Proof Supervised LED Warning Light

Model 27XL-024*-4-MOD explosion-proof LED light produces 60 high-intensity flashes per minute. Model 27XL-024-4-MOD is unique to the market because it covers an entire range of possible mounting configurations – including dome up. This warning light operates on 24VAC/DC, with a 4-wire supervised power circuit.

The 27XL-024*-4-MOD features a standard low in-rush circuitry design that provides greater compatibility with factory automation control systems and less electrical interference with in-rush sensitive devices. Corrosion resistance is achieved with a powder coat finish applied over the copper-free aluminum housing.

Because it is easy to install and requires very low maintenance, it is ideal for use in areas such as oil rigs, mines, refineries, and chemical plants
