

OPPCE-S0

Brand Features

The OPPCE Super Duty Lighting Control Module is CE compliant and designed for extreme load conditions.

Item Description

20A CE Power Pack for Occupancy Sensors, features include Auto ON, Manual ON, Local Switch, Latching Relay; Line Voltage Input: 230VAC +/-10%, 50/60Hz; Low Voltage: Input-24VDC, 2mA, Output-24VDC, 225mA. Housing: Surface Mount, RoHS Compliant, Title 24 Compliant, ASHRAE 90.1 Compliant, Color: Gray

Color:  Grey

UPC Code: 07847767256

Country Of Origin: China

Features and Benefits

- Fail-safe/Return-to-Closed capability
- Power interruption feature guarantees to close the relay; 5 seconds after power restoration, lights will return to current state
- Exclusive self-detect configurable local switch input - momentary or maintained
- Configurable for Auto-ON and Manual-ON occupancy sensor inputs
- Photocell (switching only) ready
- Robust and reliable mechanically held 16A latching relay provides dependability and robust performance for all load types and provides power savings over electrically held relay power packs
- Industry exclusive fail-safe circuitry - in the event of product failure, Return-to-Closed capability causes relay to default to a closed position (ON) for safe operation and alleviates life safety concerns
- Industry exclusive H.I.S. circuit designed to handle high inrush electronic ballast loads
- Factory calibrated zero crossing for extended life of the relay
- Submitted and passed for stringent testing: Tested over 1,500,000 loaded cycles, Passes NEMA 410 testing for electronic ballast current overload at 16A
- Output short circuit protection
- Internal voltage regulated at 24VDC, 175mA
- Optimal installation flexibility
- RoHS Compliant
- CE Compliant
