## SPLIT LOCK WASHERS – GRADE 5 STEEL AND GRADE 8 STEEL, YELLOW ZINC

The following Specification Sheet applies to all **Split Lock Washers – Grade 5 Steel and Grade 8 Steel, Yellow Zinc** in our **JLWHA** series.

| Nom inal<br>Washer<br>Size | A                  |      | B                   | T                                              | W                | B W              |
|----------------------------|--------------------|------|---------------------|------------------------------------------------|------------------|------------------|
|                            | Inside<br>Diameter |      | Outside<br>Diameter | Mean Section<br>Thickness<br>( $t_1 + T_0$ )/2 | Section<br>Width | Bearing<br>Width |
|                            | Max                | Min  | Max                 | Min                                            | Min              | Min              |
| 1/4                        | .260               | .252 | .487                | .062                                           | .109             | .076             |
| 5/16                       | .322               | .314 | .583                | .078                                           | .125             | .087             |
| 3/8                        | .385               | .377 | .680                | .094                                           | .141             | .099             |
| 7/16                       | .450               | .440 | .776                | .109                                           | .156             | .109             |
| 1/2                        | .512               | .502 | .869                | .125                                           | .171             | .120             |
| 5/8                        | .641               | .628 | 1.073               | .156                                           | .203             | .142             |
| 3/4                        | .766               | .753 | 1.265               | .188                                           | .234             | .164             |
| 7/8                        | .894               | .878 | 1.459               | .219                                           | .266             | .186             |

### Specification Requirements:

- Dimensions: ASME B18.21.1
- Material: Alloy Steel per ASME B18.21.1
- Finish: Mechanical Zinc per ASTM B695, Class 5, Type 2 (Yellow)
