

## Carpenter Pencil

Mark thick lines on rough surfaces and thin lines on smooth surfaces before you cut or perform other tasks on wood, concrete or stone using the Empire® Level Carpenter's Pencil. This pencil has a unique ovular-rectangular shape, which helps keep it from rolling between your fingers while you create lines, so each line is quick, clear and precise. The shape also prevents it from rolling off surfaces accidentally when you put it down between tasks. The soft wood Empire Level carpenter pencil is easy to sharpen with a pen knife or specialized sharpener. It also features durable and dense medium lead that sharpens quickly and lasts a long time. The Empire Level unique shape carpenter pencil is bright blue, so you can quickly locate it while you work, even on a crowded job site.

### INCLUDES:

- (1) Carpenter Pencil (87BLK)

### FEATURES:

- **Unique shape helps prevent rolling off surfaces and between fingers**
