ITEM# SSCLW12-2

12” Stainless Steel Clawbar

Use the STILLETO® 12-Inch Stainless Clawbar Nail Puller with DIMPLER® to handle any nail pulling task on the job site. It features stainless steel construction that's strong enough to handle the biggest nails and has a polished finish that won't rust. Stiletto's nail puller also has an open cross-bar design that reduces its overall weight without sacrificing strength. The patterned handle also provides a comfortable and sure grip. Stiletto's claw bar has a patented Dimpler feature that makes it easy to remove countersunk nails. Center the ring over the nail, give it a quick tap with your hammer, and the Dimpler creates a gap around the nail head. The nail puller tool has angled and straight claws that let you attack nails from multiple directions, and its 12-inch length easily fits between studs and joists without sacrificing leverage.

INCLUDES:

(1) 12” Stainless Steel Clawbar (SSCLW12-2)

FEATURES:

- Patented DIMPLER feature makes pulling nails cleaner & easier
- Two framing nail pullers; angled and straight end
