INSTALLATION INSTRUCTIONS

Please read these instructions completely before you begin.

adorne® switches are designed for installation in standard electrical boxes. However, some of the installation methods vary slightly from traditional methods. If you do not understand these instructions or are unsure of your abilities, seek the assistance of a qualified electrician.

Use only with Legrand adorne® system.

For more information and helpful how-to videos, visit www.adornemyhome.com/install.

WARNING
To prevent severe shock or electrocution, always disconnect power at the service panel before beginning work.

When replacing existing switches, label wires before disconnecting. Disconnect old switch.

1

If necessary, cut wires and strip insulation using stripping guide on back of switch.

2

Connect frame ground wire to bare ground wire in box. Fold ground wires into back of box. Mount frame to wall box with screws provided. Tighten screws just enough to hold frame in place. Do NOT overtighten.

3

TIPS
• Pre-fold wires into wall box to make it easier to fit them in the box when switch is connected.
• Use caution to avoid marring wall surface with the metal frame.

INSTALLATION GUIDELINES

Sample Installation: Paddle Switch, 2-Module | Catalog Number: ASPD1532

Use only with Legrand adorne® system.

For more information and helpful how-to videos, visit www.adornemyhome.com/install.

WARNING
Failure to connect the ground wire will result in an unsafe installation that could lead to personal injury.
Connect new switch as shown. Make sure the terminal holes are clear. Insert wires into terminals and tighten screws securely.

**NOTE**
- If you are installing multiple switches in the frame, wire all devices before snapping them into the frame.

**Single Pole**
- Connect one wire to 1-POLE.
- Connect other wire to HOT.
- Do NOT use 3-WAY.

**3-Way**
- Connect the wire identified as Common/Hot in Step 1 to HOT.
- Connect one of the other wires to 1-POLE.
- Connect remaining wire to 3-WAY.

**NOTE**
- If you have purchased an adorne® Locator Light or Accent Nightlight, please refer to those instructions at this step.

**WARNING:** Do not pair different size wires in the same terminal. If you have different size wires, use a wire nut to add a 6 inch pigtail of the same gauge wire to the smaller gauge wire.

**NOTE**
- If you need to remove switch after snapping into frame, first remove frame from wall box to access the three locking tabs on the back of the switch. Insert a flat screwdriver to depress tabs as you apply pressure to push switch out.

**NOTE**
- To remove wall plate, insert a small, flat screwdriver in notches on wall plate and twist gently to pry from frame.

Carefully fold wires into box. Snap switch into frame.

Snap wall plate to frame. There are three click-stops to adjust the fit of the wall plate to the switch and the wall.

Never apply cleaner directly to the switch or wall plate. Apply to a soft cloth and use cloth to remove any smudges from the product.
Sample Installation: Paddle Dimmer | Catalog Number: ADPD703H

**1.** When replacing existing dimmers, label wires before disconnecting. Disconnect old dimmer.

**2.** If necessary, cut wires and strip insulation using stripping guide on back of dimmer.

**3.** Connect frame ground wire to bare ground wire in box. Mount frame to wall box with screws provided. Tighten screws just enough to hold frame in place. Do NOT overtighten. (To 10 in. lbs.)

**CAUTIONS**

- To reduce the risk of over-heating and possible damage to other equipment, do not install incandescent dimmer to control a receptacle, a fluorescent light or ball, a motor-operated appliance, or a transformer-supplied appliance.
- Do NOT use dimmer with incandescent lamps whose power requirements exceed maximum wattage of the dimmer.
- Do NOT connect dimmer to power source other than 120VAC, 60 Hz.

**TIPS**

- Pre-fold wires into wall box to make it easier to fit them in the box when dimmer is connected.
- Use caution to avoid marring wall surface with the metal frame.

**INSTALLATION INSTRUCTIONS**

Please read these instructions completely before you begin. adorne® dimmers are designed for installation in standard electrical boxes. However, some of the installation methods vary slightly from traditional methods. If you do not understand these instructions or are unsure of your abilities, seek the assistance of a qualified electrician.

**WARNING**

Failure to connect the ground wire will result in an unsafe installation that could lead to personal injury.

Sample Installation: Paddle Dimmer | Continued

5. Connect new dimmer as shown. Make sure the terminal holes are clear. Insert wires into terminals and tighten screws securely. Do NOT over-tighten, (to 10 in. lbs.)

NOTE - No multi-gang derating required.

NOTE - If you have purchased an adorne Locator Light or Accent Nightlight, please refer to those instructions at this step.

6. Carefully fold wires into box. Snap dimmer into frame.

NOTE - If you need to remove dimmer after snapping into frame, first remove frame from wall box to access the four locking tabs on the back of the dimmer. Insert a flat screwdriver to depress tabs as you apply pressure to push dimmer out.

7. High end light level adjustment
The dimmer is pre-set so its highest setting provides maximum brightness. To reduce maximum brightness and save energy, you can adjust the high-end light level. Remove cover assembly by pressing bottom center snap and lifting cover.

High-end light level adjustment: Rotate wheel downward to reduce output voltage. Maximum adjustment reduces output by 10%.

Replace cover assembly. Hook at the top and rotate down to snap into place. Note: Sliders need to be in the same position during cover re-assembly.

8. Snap wall plate to frame. There are three click-stops to adjust the fit of the wall plate to the dimmer and the wall.

NOTE – To remove wall plate, insert a small, flat screwdriver in notches on wall plate and twist gently to pry from frame.

Wipe the dimmer with a damp, clean cloth. DO NOT clean dimmer with chemicals or cleaning solutions.

WARNING: Do not pair different size wires in the same terminal. If you have different size wires, use a wire nut to add a 6 inch pigtail of the same gauge wire to the smaller gauge wire.

Same size. Different size with pigtail. Different size.
INSTALLATION GUIDELINES

Sample Installation: Tamper-Resistant Outlet | Catalog Number: ARTR152

1. When replacing existing outlets, label wires before disconnecting. Disconnect old outlet.

2. If necessary, cut wires and strip insulation using stripping guide on back of outlet.

3. Connect frame ground wire to bare ground wire in box. Fold ground wires into back of box. Mount frame to wall box with screws provided. Tighten screws just enough to hold frame in place. Do NOT overtighten.

TIPS
- Pre-fold wires into wall box to make it easier to fit them in the box when outlet is connected.
- Use caution to avoid marring wall surface with the metal frame.

For more information and helpful how-to videos, visit www.adornemyhome.com/install.

Use only with Legrand adorne® system.

INSTALLATION INSTRUCTIONS

Please read these instructions completely before you begin. adorne® outlets are designed for installation in standard electrical boxes. However, some of the installation methods vary slightly from traditional methods. If you do not understand these instructions or are unsure of your abilities, seek the assistance of a qualified electrician.

WARNING
To prevent severe shock or electrocution, always disconnect power at the service panel before beginning work.

WARNING
Failure to connect the ground wire will result in an unsafe installation that could lead to personal injury.

WARNING
Do not overtighten the screws provided with this outlet.
