

Weatherproof

Weatherproof Box Holder

Features

- Can be used as an external means of support to meet the requirements of 2011 NEC Section 314-23

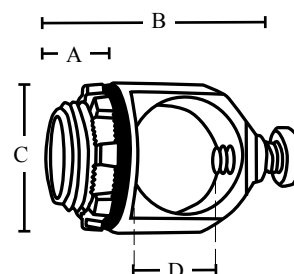

Application

The 1/2" inch weatherproof box holder is a single-product solution from Topaz to affix electrical boxes.

- Crafted of corrosive resistant die cast zinc and built to last, the box holder stubs up electrical boxes and fire alarms between bar joists.
- Installation is easy—simply insert the box support into the electrical box. The entire assembly is held secure with a 1/2" rigid steel conduit or water pipe.
- The box holder can be used for installation of equipment where a rigid pipe is used for a holding means when a 1/2" knockout is present.

Standard Material

- Corrosive resistant die cast zinc
