

## 19002 Stoplight™ Poster- Red

### Product Description

Stoplight™ Food Safety Program is a visual identification labeling program that ensures Maintenance employees use and store MRO chemicals in the proper locations. The Stoplight™ program involves using color coded stickers placed on MRO chemicals to determine where the products can be used, who may use these products, and where they should be stored. The stickers provide flexibility within the program, and each facility makes their own determination how to color code processing areas, applications and products. Stoplight™ has proven helpful in improving audit scores, supplier reviews, and adds a program that meets the needs of GFSI schemes used in North America. CRC offers no charge, local consulting on program implementation for individual sites.

### Product Specifications Applications

Stoplight™ Red Poster identifies products, usage areas or applications defined by the user as restricted or designated “red”.

UPC: 078254190020

Unit Package Description: 1 Poster Shrink Wrapped and folded to size 10”H X 12”W

Size: 20”H X 24”W

Units per Case: 1
